EDUCATION

Georgia Institute of Technology

Atlanta, GA

Bachelor of Science in Computer Engineering

Aug 2025 - May 2028

- Thread: Cybersecurity/Signal and Information Processing
- Relevant Coursework: Linear Algebra, Data Struct & Algorithms, Computer Arch, Diff Eq, Malware Reverse Eng
- Awards: Zell Miller Scholarship, Dean's List

EXPERIENCE

Project Manager | GTSF Investment Committee - Quant Sector Atlanta, GA

Aug 2025 - Present

- Developed a centralized portfolio controller to coordinate capital allocation, rebalancing, and risk constraints
- Oversaw backtesting and logging, and out of sample validation to ensure strategy correctness and reproducibility
- Completed a 4% acceptance mentorship program in \$2.5M AUM student-ran philanthropic endowment fund

Production Operations Assistant | Soy Shop Atlanta, GA

Dec 2024 - Aug 2025

- Cross-trained across multiple production roles on a multi-million-dollar manufacturing machine
- Learned end-to-end production processes to understand cost structure in a CPG environment
- Collaborated with supervisors and operators to adapt workflows based on daily production needs

Team Member | Robotics Athens, GA

Aug 2024 - Dec 2024

- Created a detailed layout for an ant-weight combat battle bot using CAD in Fusion
- Programmed movement in python into an Arduino for a set mode of movements

PROJECTS

CryptoGame Comparator | Java, JavaFX, REST APIs, JSON (Gson)

- Developed an interactive JavaFX application that compared 1000+ Steam game prices to 1000+ cryptocurrencies
- Integrated CheapShark and CoinLore APIs to fetch live game and cryptocurrency data
- Implemented JSON parsing, filtering, and a responsive GUI to display coins relative to the selected game price

Realized Volatility & SPY Return Prediction | Python, Pandas, NumPy, Financial Modeling

- Analyzed the predictive power of realized volatility on next-day SPY returns using volatility estimators
- Built a linear factor model incorporating realized volatility, lagged returns, and volatility changes
- Performed out-of-sample backtesting (2000-2024), improving risk-adjusted performance over Buy & Hold

LEADERSHIP & ACTIVITIES

Team Member | Trading at Tech Atlanta, GA

Aug 2025 - Present

- Engaged in quantitative finance research and development, learned techniques in trading strategies and analysis
- Collaborated with peers to explore applications of quantitative models in financial markets

President | Chess Buddies Atlanta, GA

Aug 2022 - May 2024

- Led an organization dedicated to teaching chess to 50+ underprivileged children across Metro Atlanta
- Directed and coordinated a 6 person volunteer team to host 60+ events each school year across 2 schools

Varsity Captain | Walton Math Team Marietta, GA

Aug 2020 - May 2024

- Led varsity math team in regional and state tournaments, teaching 100+ members probability and statistics
- Managed 80+ weekly team meetings and organized tournaments with sponsors

AWARDS

2x Qualifier AIME

Achieved Top 3 finishes in regional Science Olympiad events: Robot Tour, WiFi Lab, and Scrambler

SKILLS

Programming Languages & Tools: Java, Python(NumPy, pandas, statsmodels), IDA Pro, C, Assembly, Linux, Financial Modeling, Rest APIs, HTML, CSS, LaTeX, Excel

Interest: Golf, Basketball, Pickleball, Music, Poker
